

Search Flow

Search book by :

- libelle
- ISBN
- author

On Search

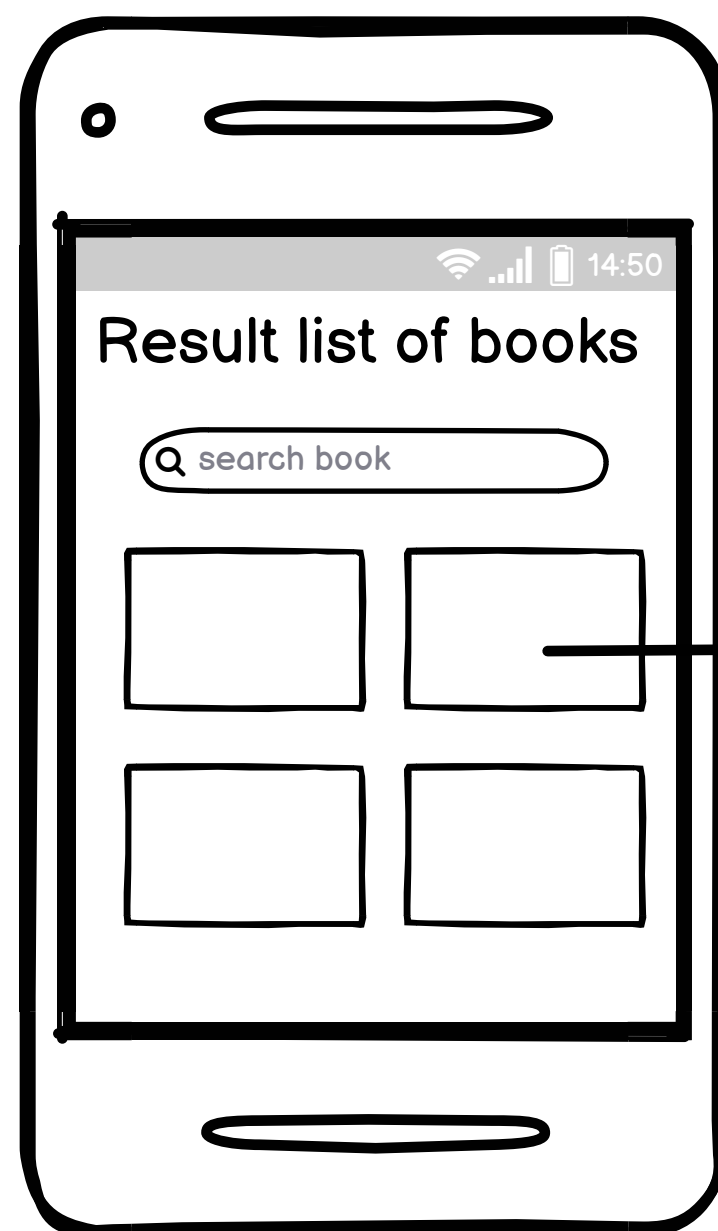

Search functionalities :

- autocomplete
- multiple search

POST text to API : /search?text=xxxx

Infos

Shows book info along with a map of which library contains it.
List of libraries can be shown based of a proximity of user.
We can maybe add similar books

On Click/Tap

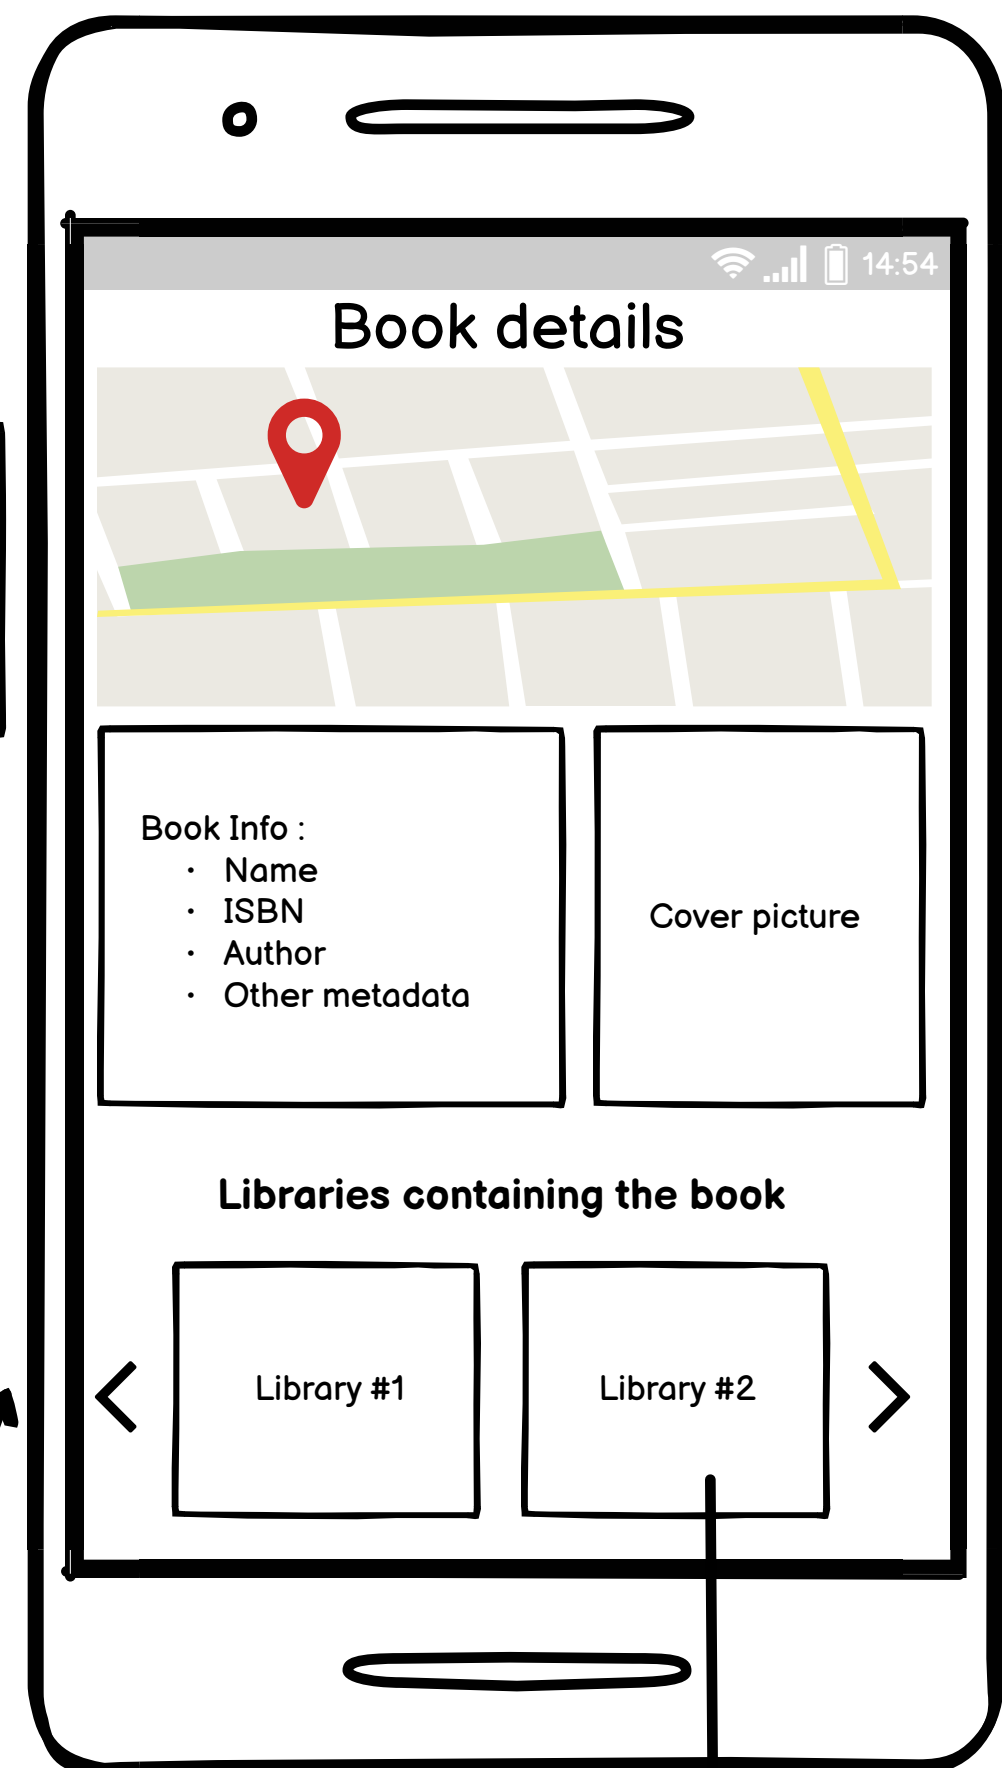

Result is a grid of books (available or not)

- can relaunch a search with different results

POST : /search?text

- for now Filters are not supported
- Each grid shows the cover picture and a title of the books along with the author
- clicking on an element leads to book details

GET : /book/id

On Click/Tap

Shows details of the library :
GET: /library/book/book_id
